

Bottles & Jars Catalog 2026

Empowering African Brands through Packaging Solutions

LesoPlastics

Leso Plastics Pty Ltd began in 2016, as a bold response to a key pain area in the African manufacturing landscape. For too long, bottlers and fillers in regions like Lesotho were forced to import expensive, bottles & jars from distant urban hubs. By localizing PET bottle blowing while sourcing preforms globally, we proved that we could create a resilient local supply chain that catalyzes industrial development.

Every day, we seek to go one step further.

We see you as a partner, not as a client. We are committed to your success through helping you reduce your costs, increase your productivity, support your brand with our design and production abilities and be a part of your success.

Your success is our success.

Our quality, our pricing, our dependability is your key to a seamless packaging experience.

Affordable Customized Packaging. If you're looking for something outside this catalog or completely outside-the-box - TALK TO US. You will be pleasantly surprised at how affordable it can be.

Today, Leso Plastics is the first anchor point for a vision that spans 14 factories across 8 countries, including Eswatini, Mozambique, Botswana, Namibia, Zimbabwe, and Malawi.

PCR/RPET Bottles & Jars

AVAILABLE IN 30%, 50%, 70%, 100%

At Leso Plastics, we take our commitment to the environment very seriously. Not only do we do our part in social projects in the communities we serve but also endeavor to find ways to positively impact the world around us.

We understand the importance of recycling and the immense positive impact that can have on our environment. Which is why we have made it our mission in 2026 to bring rPET to African brands at affordable prices.

It is our mission to help as many African brands adopt recycled PET, while still staying competitive. Your success is our success.

Let's build a better world together.

ALL OUR PET MODELS ARE AVAILABLE IN rPET.

LP and our production partners follow a closed-loop recycling process that transforms used PET bottles into high-quality RPET packaging. Collected, cleaned, converted into premium resin, and molded into preforms and bottles with the same strength, clarity, and performance as virgin PET. PCR/RPET preforms are available in 30%, 50%, 70%, and 100% recycled content, completing a sustainable bottle-to-bottle cycle that reduces plastic waste and environmental impact.

Leso Plastics

OVER 25 COUNTRIES WORLDWIDE USE THE PRODUCTS IN OUR RANGE

Between our production partners and us - the products we distribute cover the globe.

At LP we demand the highest standards from our production partners, quality is ingrained in every stage of our operations, with stringent quality control measures followed from raw material procurement to final inspection done. We ensure consistent performance, reliability, and adherence to the highest industry standards.
