

Empowering African Brands through Packaging Solutions

Caps & Preform Catalog 2026

LesoPlastics

Leso Plastics Pty Ltd began in 2016, as a bold response to a key pain area in the African manufacturing landscape. For too long, bottlers and fillers in regions like Lesotho were forced to export natural resources while importing expensive, finished bottled products from distant urban hubs.

We established our first facility in Maseru, Lesotho, as a revolution to empower local manufacturing. By localizing PET bottle blowing while sourcing preforms globally, we proved that we could create a resilient local supply chain that catalyzes industrial development.

Today, we seek to go one step further.

We seek to empower other bottle blowing companies and give them the edge we have developed over the past decade. In turn, we seek to better enable them to help bottle fillers around Africa. Thus, enabling a healthy and vibrant, manufacturing ecosystem that depends on a support system we are proudly a part of.

We believe that our success as an organization is only possible through the success of the entire industry.

Today, Leso Plastics is the first anchor point for a vision that spans 14 factories across 8 countries, including Eswatini, Mozambique, Botswana, Namibia, Zimbabwe, and Malawi.

THESE ARE MOST POPULAR PREFORMS & CAPS.

PLEASE REQUEST OUR COMPREHENSIVE LIST OR SEND US YOUR SPECIFIC REQUIREMENT IF YOU DON'T FIND WHAT YOU'RE LOOKING FOR.

HOT-FILL GRADE PREFORMS ALSO AVAILABLE ON ORDER.

PCR/RPET PREFORMS

AVAILABLE IN 30%, 50%, 70%, 100%

At Leso Plastics, we take our commitment to the environment very seriously. Not only do we do our part in social projects in the communities we serve but also endeavor to find ways to positively impact the world around us.

We understand the importance of recycling and the immense positive impact that can have on our environment. Which is why we have made it our mission in 2026 to bring rPET to African brands at affordable prices.

It is our mission to help as many African brands adopt recycled PET, while still staying competitive. Your success is our success.

Let's build a better world together.

ALL OUR PET PREFORM MODELS ARE AVAILABLE IN rPET.

LP and our production partners follow a closed-loop recycling process that transforms used PET bottles into high-quality RPET packaging. Collected, cleaned, converted into premium resin, and molded into preforms and bottles with the same strength, clarity, and performance as virgin PET. PCR/RPET preforms are available in 30%, 50%, 70%, and 100% recycled content, completing a sustainable bottle-to-bottle cycle that reduces plastic waste and environmental impact.

Leso Plastics

OVER 25 COUNTRIES WORLDWIDE USE THE PRODUCTS IN OUR RANGE

Between our production partners and us - the products we distribute cover the globe.

At LP we demand the highest standards from our production partners, quality is ingrained in every stage of our operations, with stringent quality control measures followed from raw material procurement to final inspection done. We ensure consistent performance, reliability, and adherence to the highest industry standards.
